

16) In making provision for new employment land, which issues concern you?

Qualitative answers given for 'other' (132/663):

Flooding

Food outlets

No heavy industry - we are a small rural town.

No night time business near residential areas

Not all service industries

Any

Scrap metal

Concerned about the entrance to allotments Churchill Avenue only being one need another drive in please

No more antique or charity shops

Site of old clinic at side of jubilee way could be remodelled - at present it is a mess and could also be more community-friendly.

Larger supermarket

Boot repair

No requirement for retails park style development

Boston road indust. Estate is good.

Smoke pollution

Manufacturing

Waste recycling

Game

Chemical

Engineering

Chemical

Supermarket, scrap & motor traders, wind generators

Supermarkets

Incinerator

Chemicals, incinerator, scrap metal

Animal testing

Scrap dealers

Chicken farms

Traffic congestion, flooding

No bad smells

More dress shops

Abattoir, scrap yard, large manufacturers

Long-term employment

Large supermarket

Any offering jobs to younger people

Jobs for young

Cheaper parking

Over bright lighting

General store

More variety

More supermarkets and night clubs

Would not welcome heavy industrial

Traffic

No heavy industry

Heavy manufacturing industries. Storage depots

Clothing shops at reasonable prices

Nothing that will damage the environment

Soft play

Business that are going to give real skill/training to youngsters.

Not heavy industry

Concerned it may cause resentment and disruption if residents not involved in planning or consulted.

Supermarket or Haulage

More chemist and DIY	Anything creating smell or disturbance. Anything too far out of character for an agricultural area and small market town.
We need commercial development investment.	Road infrastructure
Chicken/livestock, industrial and chemical	Lack of pollution by noise smell and lights
Only light industry	No battery hens
Anti-social	Gents clothing
Large industry. Lincolnshire is farming country and employment should be small and connected with farming except no slaughter houses	Very large business on Boston road industrial estate but many parks on the road. Very dangerous
Noisy	Any that requires early morning deliveries
Any that is working 24 hours a day and has HGVs in and out all day and night	Children's clothing and educational equipment
Nightclubs	Not clear question
No smoke/toxic fumes. None which cause health problems	Any new business or factories be on outskirts of town in/e/ industrial sties
Should be on industrial estate	Not in residential areas
Night clubs. Scrape yards. Any noisy businesses	Battery hens
Not heavy - needs to keep with small town. Drainage	Keep charges low of tourists stay away. Wide and varied in town too many food outlets too much some competition. Variety is the spice of life.
Mixed	Should do all we can to welcome new business and jobs
No scrap yards	Don't feel we need an influx of hazardous employers that no one else wants. But have to accept that some may need to have an element of environmental adventure to boost jobs in Horncastle. For the touns - without them it will wither so we need to capitalise on out low business costs appeal for expansion/diversity.
Abattoirs, scrap metal, engine development	Heavy industry
No more cafes. More specialist shops	Anything with potential to affect the environment via pollution etc.
No supermarkets	Large employer
Brothels	Horncastle needs more employers
A big supermarket	Clothing for adults
Charity shops, cheap shops	Scrap metal etc.
Businesses the create smell	Noise, hours etc. - already flouted. I.e. scrapyard, timber yard.
Not manufacturing	
Any causing pollution	
Mining. High calibre jobs	
The should be adequate free parking for both trading estate and town centre workers.	
Manufacturing	

In these times what development are we talking about? We don't like this questionnaire as the questions refer to one option and also seem to be for development and we are not

Sewage + Industrial

Industrial or noisy/smelly

Horncastle needs more full time jobs for temp / 0 hours.

Immigrants

Diversity required

No more antique and tea shops

Industrial/chemical business etc. Large supermarkets. Let's keep Horncastle a market town with individual

Shops/offices

Depends on location relative to housing

Finding companies to use it + number employed

Heavy industry

No more supermarkets i.e. Tesco ASDA etc.

Light engineering

Access to and from the site, traffic congestion in town.

Industrial, chemical

All factors need to be considered equally so as not to have a negative impact on the community

Noisy factories

Protection of Lincolnshire landscapes not just money talks

Heavy industry

Enough charity shops

Light or heavy industry + Light or heavy industry

Large shop groups taking over

Heavy engineering / construction co.

Industry to stay within designated industrial parks

We need now bigger business to expand town's future

Smell, location, impact on neighbours

What employment and what job in the present climate are you mad

Hazardous waste products

Power station

Power Station
